

Gilles Stupfler

PhD in Applied Mathematics

Professor of Statistics, University of Angers

Personal information

Date and place of birth: 15th May 1988, Strasbourg, France
Citizenship: French
Email: gilles.stupfler@univ-angers.fr
Personal webpage: <https://math.univ-angers.fr/~stupfler>
Twitter: @GillesStupfler

Education

2019-2020 Habilitation degree
University of Rennes 1
Referees: Claudia Klüppelberg, Thomas Mikosch and Olivier Wintenberger

2016-2018 Postgraduate Certificate in Higher Education
University of Nottingham

2009-2011 PhD in Applied Mathematics
University of Strasbourg
Advisors: Stéphane Girard and Armelle Guillou
Referees: Hansjörg Albrecher and Irène Gijbels

2009 Agrégation de Mathématiques
Ranked 21st among all 252 candidates who were awarded the Agrégation

2007-2009 MSc in Pure and Applied Mathematics
University of Strasbourg

2006-2007 BSc in Pure and Applied Mathematics
University of Strasbourg

Employment

Sept 2022-present Full Professor (Professeur des Universités)
University of Angers, Department of Mathematics

Sept 2019-Aug 2022 Assistant Professor (Sept 2019-Aug 2021)
Associate Professor (Sep 2021-Aug 2022)
ENSAI Rennes & CREST

Sept 2016-Sept 2019 Assistant Professor of Statistics
University of Nottingham, School of Mathematical Sciences

Sept 2012-Aug 2016 Assistant Professor (Maître de conférences)
Aix-Marseille Université, Department of Economics

Sept 2012-Aug 2016 Oral examiner in “Classes préparatoires”
Lycée Vauvenargues, Aix-en-Provence

Sept 2010-Aug 2012 Oral examiner in “Classes préparatoires”
Lycée Kléber, Strasbourg

Sept 2009-Aug 2012 Research and Teaching Assistant
University of Strasbourg, Department of Mathematics

Teaching experience

As a Full Professor at the University of Angers (2022-now)

Courses taught:

- **Elementary Analysis lectures and tutorials, first-year undergraduate students in Mathematics, Physics and Chemistry (Autumn 2022-present)**
Content: Continuity, differentiability, Riemann integral.
- **Elementary Algebra lectures and tutorials, first-year undergraduate students in Mathematics, Physics and Chemistry (Autumn 2022-present)**
Content: Euclidean algorithm for polynomials, fundamental theorem of algebra, factorisation of polynomials over \mathbb{R} and \mathbb{C} , rational functions.
- **Probability and Statistics lectures and tutorials, second-year undergraduate students in Earth and Life Sciences (Spring 2023-present)**
Content: Elementary probability theory, random variables, classical distributions, linear correlation coefficient.
- **Diagonalisation tutorials, second-year undergraduate students in Mathematics (Spring 2023-present)**
Content: Characteristic polynomial, diagonalisation, systems of linear differential equations.
- **Numerical Analysis lectures, tutorials and practicals, second- and third-year undergraduate students in Mathematics (Spring 2023-present)**
Content: Numerical approximation of solutions to nonlinear equations. Interpolation using Lagrange polynomials. Numerical integration via the Newton-Cotes formulae. Numerical methods for differential equations. Implementation in Python.
- **Regression Models lectures, tutorials and practicals, first-year postgraduate students in Data Science (Spring 2023-present)**
Content: Linear regression: Estimation, inference, analysis of residuals, one- and two-way ANOVA. Logistic regression: Estimation, inference, model validation, interpretation. Real data examples using R.

I also tutor and/or supervise postgraduate students during their dissertations and summer internships, and help to organise mock oral exams for graduate student teachers in Mathematics.

Aside from my teaching duties at Angers I have also taught Extreme Value Theory to final-year postgraduate students at ENSAI (Autumn 2022-present) and Extreme Risk Analysis to final-year MSc students at Toulouse School of Economics (Spring 2023-present).

As a Lecturer and later Associate Professor at ENSAI (2019-2022)

Courses taught:

- **Probability lectures, third-year undergraduate students in Mathematics with Economics (Autumn 2019-present, two semesters total)**
Content: Random variables, random vectors, Gaussian random vectors, conditional expectation, stochastic convergences, applications in statistics.
- **Generalised Linear Models lectures and tutorials, first-year postgraduate students in Statistics (Autumn 2021, one semester total)**
Content: General framework of GLMs, estimation, inference. Binary data, categorical data, count data. Real data examples using R.
- **Advanced Regression Models lectures and tutorials, first-year postgraduate students in Statistics (Spring 2020 and 2021, two semesters total, module taught in English)**

Content: Local polynomial regression, partially linear models, single-index models, real data examples using R.

- **Extreme Value Theory lectures and tutorials, final-year postgraduate students in Statistics (Autumn 2020, one semester total)**

Content: Extreme value models, estimation in and outside of heavy-tailed models, real data examples using R.

- **Parametric Inference lectures and tutorials, final-year postgraduate students in Mathematics (Autumn 2020, one semester total, module taught in English using flipped learning)**

Content: M-estimation for continuous or convex objective functions, consistency and asymptotic normality, semiparametric extension through extreme value analysis.

I also tutored and/or supervised postgraduate students during their summer internships.

As an Assistant Professor at the University of Nottingham (2016-2019)

Courses taught:

- **Statistical Models and Methods tutorials, second-year undergraduate students in Mathematics (Autumn 2016-Autumn 2017, two semesters total)**

Content: Classical distributions, maximum likelihood estimation, statistical testing.

- **Probability Models and Methods tutorials, second-year undergraduate students in Mathematics (Autumn 2016, one semester total)**

Content: Random variables and vectors, marginal and conditional distributions, change-of-variables formula.

- **Statistical Inference lectures and tutorials, third-year undergraduate students in Mathematics and postgraduate students in Statistics (Autumn 2016-Autumn 2019, three semesters total)**

Content: Sufficient/complete statistics, maximum likelihood asymptotics, hypothesis testing and Neyman-Pearson lemma, Bayesian statistics, introduction to decision theory.

- **Data Analysis and Modelling/Vocational Mathematics/Vocational Financial Mathematics workshops, full-year module, third-year undergraduate students and postgraduate students in Mathematics (Autumn 2017-Autumn 2019, two years total)**

Content: Project module involving the application of mathematics to practical, open-ended problems close to those that mathematics graduates would encounter in industry.

As part of my teaching duties, I also tutored small groups of typically 4 to 6 first-year students during a one-hour session each week during term time. Topics included foundations of mathematics, calculus, and basic linear algebra. I was also heavily involved in undergraduate and postgraduate dissertation supervision.

I have also had the opportunity to engage in outreach, with the Nottingham Potential Summer School, for which I organised activities around random walks for Year 12 students (16-17 years old).

As an Assistant Professor at Aix-Marseille Université (2012-2016)

Courses taught:

- **Mathematics 1 lectures and tutorials, first semester of the BSc in Economics and Management (Autumn 2012-Autumn 2015, four semesters total)**

Content: Differentiability, constrained optimisation, examples in economics.

- **Continuous Probability Models tutorials, third semester of the BSc in Mathematics Applied to Social Sciences (Autumn 2012-Autumn 2014, three semesters total)**
Content: Continuous distributions, random vectors, change-of-variables formula.
- **Probability 2 lectures and tutorials, fourth semester of the BSc in Economics and Management (Spring 2013-Spring 2016, four semesters total)**
Content: Discrete and continuous distributions, random vectors, conditional expectation, law of large numbers and central limit theorem.
- **Basic Econometrics lectures and tutorials, fifth semester of the BSc in Mathematics Applied to Social Sciences (Autumn 2012-Autumn 2015, four semesters total)**
Content: Ordinary least squares, hypothesis testing, multicollinearity, heteroscedasticity, autocorrelation and their detection.
- **Mathematical Optimisation lectures and tutorials, fifth semester of the BSc in Economics and Management (Autumn 2013-Autumn 2015, three semesters total, last semester taught using flipped learning)**
Content: Constrained optimisation, KKT conditions, convex problems.
- **Statistics lectures and tutorials, first semester of the three-year Magistère of the Aix-Marseille School of Economics programme (Autumn 2015, one semester total)**
Content: Estimation, classical limit theorems, maximum likelihood estimation, classical testing procedures.
- **Sampling for Rare Events lectures and practicals, graduate course in the MSc in Actuarial Mathematics (Spring 2016, one semester total)**
Content: Importance sampling. Application to the calculation of ruin probabilities.

As a PhD candidate and teaching assistant at the University of Strasbourg (2009-2012)

Courses taught:

- **Probability and Statistics tutorials, third semester of the BSc in Mathematics and of the BSc in Mathematics and Economics (2009-2011, three semesters total)**
Content: Combinatorics, discrete and continuous distributions, conditional probability, characteristic function, limit theorems.
- **Probability and Statistics tutorials, sixth semester of the BSc in Mathematics (2011, one semester total)**
Content: Basic inferential statistics, law of large numbers, central limit theorem.
- **Mathematical Statistics tutorials, sixth semester of the BSc in Mathematics (2010-2011, three semesters total)**
Content: Conditional expectation, Gaussian random vectors, linear model, exponential family, Cramér-Rao lower bound.

Research activities

Research interests

My main area of research is extreme value analysis. Much of my recent efforts in this direction have focused on how to measure and estimate extreme risk, particularly in actuarial and financial contexts. More generally, my work sits at the interface of extreme value theory and various subfields of statistics, such as:

- Semi- and non-parametric regression.
- M -estimation.
- Missing data frameworks.
- Estimation with stationary but dependent data.

Software development

- R package `ExtremeRisks`, on the estimation of extreme risk measures in time-dependent contexts. Available at <https://cran.r-project.org/web/packages/ExtremeRisks/index.html>. Joint work with S.A. Padoan.

Talks at international conferences and workshops (most recent first)

- 2023: *6th International Conference on Econometrics and Statistics*, Tokyo, Japan (**invited talk**)
54èmes Journées de Statistique, Brussels, Belgium
13th International Conference on Extreme Value Analysis, Milan, Italy
- 2022: *2022 International Indian Statistical Association Conference*, Bangalore, India (**invited talk**)
15th International Conference of the ERCIM WG on Computational and Methodological Statistics, London, UK (**invited talk**)
5th Conference of the International Society for Non-Parametric Statistics, Paphos, Cyprus (**invited talk**, cancelled)
4th Insurance Data Science Conference, Milan, Italy
53èmes Journées de Statistique, Lyon, France (**special session of the Bank, Finance & Insurance group**)
5th International Conference on Econometrics and Statistics, Kyoto, Japan (**invited talk**)
9th International Conference in Risk Analysis, Perugia, Italy (**invited talk**)
- 2021: *14th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK (**invited talk**)
Joint ENSAI-HKU-UESTC workshop on Statistics, online conference (**invited talk**)
EVA 2021, online conference
4th International Conference on Econometrics and Statistics, online conference (**invited talk**)
3rd Insurance Data Science Conference, online conference
52èmes Journées de Statistique, online conference
14th Financial Risks International Forum, online conference
- 2020: *13th International Conference of the ERCIM WG on Computational and Methodological Statistics*, online conference (**invited talk**)
Bernoulli-IMS One World Symposium 2020, online conference
- 2019: *12th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK (**invited talk**)
32nd European Meeting of Statisticians, Palermo, Italy
2nd Workshop on Multivariate Data and Software, Limassol, Cyprus (**invited talk**)
- 2018: *11th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Pisa, Italy (**invited talk**)
Recent advances in the statistical analysis of extreme environmental and actuarial risk, Nottingham, UK (**invited talk**)
- 2017: *10th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK (**invited talk**)
31st European Meeting of Statisticians, Helsinki, Finland (**invited talk**)
- 2016: *9th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Seville, Spain (**invited talk**)
3rd Conference of the International Society for Non-Parametric Statistics, Avignon, France (**invited talk**)
Workshop on Extremes, Copulas and Actuarial Science, Luminy, France (**invited talk**)
- 2015: *8th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK (**invited talk**)

- 9th Conference on Extreme Value Analysis*, Ann Arbor, Michigan, USA (**invited talk**)
- 2014: *8th International Conference on Computational and Financial Econometrics*, Pisa, Italy (**invited talk**)
- Workshop on Extreme Value Theory, with an emphasis on spatial and temporal aspects*, Besançon, France (**invited talk**)
- 46èmes Journées de Statistique*, Rennes, France
- 2013: *10èmes Journées de Statistique de Rennes*, Rennes, France (**invited talk**)
- 45èmes Journées de Statistique*, Toulouse, France
- 2012: *44èmes Journées de Statistique*, Brussels, Belgium
- 2011: *7th Conference on Extreme Value Analysis, Probabilistic and Statistical Models and their Applications*, Lyon, France

Invited seminars (most recent first)

- 2023: University of Angers, University of Bologna
- 2022: University of Western Brittany, Quebec Mathematical Sciences Colloquium, University of Geneva, University of Angers, Sorbonne University, ESSEC Business School, University of Lausanne, Bocconi University
- 2021: Aix-Marseille Université, University of Lorraine, University of Vienna, INRIA Lille Nord Europe, University of Angers, Collegio Carlo Alberto, University of Paris
- 2020: University of Southern Brittany, University of Grenoble
- 2019: University of Cardiff, Ecole Polytechnique, ENSAI Rennes, Université Libre de Bruxelles
- 2018: Ecole Polytechnique Fédérale de Lausanne
- 2017: KU Leuven, University of Newcastle, University of Nottingham, University of Reading
- 2016: Aix-Marseille Université, University of Nottingham, University Paris Descartes
- 2015: University of Aveiro, University Paris Descartes, Toulouse School of Economics
- 2014: University of Strasbourg
- 2013: Aix-Marseille Université, University of Grenoble
- 2012: University of Grenoble, University of Lyon I, University of Montpellier, University of Nancy, INSA Toulouse, Toulouse School of Economics
- 2011: University of Strasbourg, ISFA Lyon

Academic visits (most recent first)

April 2019: One week at Bocconi University (Milan) visiting Simone Padoan. Sponsored by a University of Nottingham internal grant (**£2,000**).

March and May 2018: Two weeks at the Toulouse School of Economics and one week at KU Leuven visiting Abdelaati Daouia and Irène Gijbels. Sponsored by a University of Nottingham internal grant (**£2,000**).

January 2015: One week at the University of Aveiro (Portugal) visiting Cláudia Neves. Sponsored by project DEXTE, coordinated by Cláudia Neves and financed by the Portuguese Foundation of Science and Technology (**€34,000**).

I have also made several one-week long research visits, not attached to grant funding, to the Université Paris Descartes (visiting Jonathan El Methni), INRIA Grenoble Rhône-Alpes (visiting Stéphane Girard), ISFA Lyon (visiting Stéphane Loisel) and Bocconi University (visiting Simone Padoan).

Engagement with non-academic stakeholders

My work with Estelle Derclaye on the statistical analysis of legal decisions has led to several meetings with the European Commission and the UK Intellectual Property Office (in 2018, 2019 and 2020), during which we discussed the impact of European Union policy decisions on intellectual property litigation across the European Union. This led to our work being cited several times in the 2020 *Report on the evaluation of EU legislation on design protection* published by the European Commission and available at <https://ec.europa.eu/docsroom/documents/43705>.

Supervision activities

PhD supervision

- Joseph Hachem (September 2022-present, Toulouse School of Economics, joint supervisor: Abdelaati Daouia). Project title: *Joint analysis of extreme values in massive data*. PhD studentship financed by the Toulouse-based EUR MINT consortium.
- Camille Méneur (March 2022-March 2023, ENSAI & CREST, joint supervisor: Matthieu Marbac). Project title: *Arrhythmia: Statistical modelling for detection and classification of heart defects in racehorses*. CIFRE studentship in partnership with the private company Lim Group (Bordeaux, France). **Camille interrupted her studies for personal reasons and did not graduate with a PhD. She is now working in the private sector as a data scientist.**
- Malvina Bozhidarova (October 2020-present, University of Nottingham, joint supervisors: Reuben O’Dea, Frank Ball and Yves van Gennip). Project title: *Statistical analysis of risk, failure, and extreme event propagation in the airline industry using multi-level networks*. EPSRC CASE studentship in partnership with the private company Russell Group Ltd. (Nottingham, UK).
- Abdul Haris Jameel (October 2019-present, University of Nottingham, joint supervisors: Chris Brignell and Chris Fallaize). Project title: *New analytical and simulation tools in clinical oncology*. PhD studentship financed by BAST Inc. Ltd. (Loughborough, UK).
- Emily Mitchell (October 2016-July 2021, University of Nottingham, joint supervisors: Neil Crout, Paul Wilson and Andrew Wood). Project title: *Statistical analysis of agricultural soils climate data to aid food security under environmental change*. PhD studentship funded by the Leverhulme Trust. Project selected for a poster presentation at the House of Commons during the STEM for Britain 2018 event. **Currently a postdoc at the University of Nottingham.**

Postdoctoral supervision

- Touqeer Ahmad (May 2023-now). *Machine learning and data mining of extreme values in massive data*. Funded by the Brittany Region and GENES.
- Boutheina Nemouchi (February 2021-January 2023, ENSAI & CREST). Project title: *Tail risk management and mitigation using innovative extreme value techniques*. Funded by AXA.
- Antoine Usseglio-Carleve (October 2018-September 2020, INRIA Grenoble Rhône-Alpes, joint supervisor: Stéphane Girard; then October 2020-August 2021, ENSAI & CREST, joint supervisor: Abdelaati Daouia). Project titles: *Estimation of extreme risk measures with covariate information* and *Tail risk estimation across time and space*. Funded by EDF and the ANR. **Currently Assistant Professor at the University of Avignon.**

Informal PhD supervision

- Yasser Abbas (PhD student at the Toulouse School of Economics, on a 3-year studentship from January 2020, lead PhD supervisor: Abdelaati Daouia). Project title: *A new perspective on M-quantile regression: From L^1 to L^p optimization*.

- Hibiki Kaibuchi (PhD student at SOKENDAI, Tokyo on a 4-year studentship from July 2018, lead PhD supervisor: Yoshinori Kawasaki). Project title: *A bias-reduced GARCH-EVT approach for financial risk estimation*. **Currently quantitative analyst at Mizuho Financial Group and Research Fellow at the Japan Society for the Promotion of Science.**

Graduate internship/MSc level supervision

- 2022-2023: Clément Bequet & Piotr Sarapuk (*Introduction to extreme value analysis*), Thomas Gerault & Nathan Raitière (*Financial models for volatility*) and Léo Monnier (as academic liaison officer for an internship at Thales Group).
- 2021-2022: Pierre Barbe (*On Maximum Likelihood Estimation in Extreme Value Theory*) and Joseph Hachem (*Joint extreme value analysis of high-dimensional data*).
- 2020-2021: Brandon Saintilan (*Statistical analysis of data linked to the Covid-19 pandemic*).
- 2019-2020: Yves Amevoin (*On the behaviour and estimation of extreme M-quantiles*), Brice Camel Tifa Netague (*Volatility estimation for financial time series*) and Aurélie Manaa Gonta (*Statistical estimation of the intensity of financial crises*).
- 2016-2019: Supervision of 24 MSc student dissertations at the University of Nottingham.

Summer undergraduate internship supervision

- 2018-2019: Qianlu Zhou (*Extreme quantile estimation with dependent censoring*), on a 8-week LMS-funded internship.
- 2017-2018: Jay Chawda (*Estimating extreme conditional quantiles with big data*), on an 8-week LMS-funded internship, and Oliver Church (*An empirical analysis of the effect of case law on the creation of designs*), on a 10-week internship funded with an internal grant.
- 2016-2017: Daniel Brown (*Assessing and handling stochastic variability in the extremes of a data set*), on a 10-week EPSRC-funded internship.

Funding/Grants (exceeding €10,000)

June 2022: *TSE-HEC ACPR Chair* (co-I) (€450,000)

June 2022: *EUR MINT PhD funding* (PI) (€110,000)

June 2022: *DGA-AID PhD half-stipend* (PI) (€60,000, declined by Joseph Hachem)

May 2022: *Brittany region PhD half-stipend* (PI) (€52,500, declined by Joseph Hachem)

February 2022: *ANRT Industrial PhD funding* (co-PI) (€122,000)

October 2021: *Brittany region SAD grant* (PI) (€76,000)

September 2021: *British Academy grant* (co-I) (£8,762)

February 2021: *ESRC Impact Acceleration Account grant* (co-I) (£9,450)

July 2020: *AXA Research Fund Flash call on Covid-19* (PI) (€100,000)

July 2019: *ANR grant* (co-I) (€159,000)

November 2018: *Industrial PhD funding, BAST Inc. Ltd.* (co-PI) (£100,000)

June 2017: *RPA Development Fund internal grant* (co-PI) (£23,912)

May 2017: *EPSRC Industrial CASE funding* (co-PI) (£109,852)

I have also been awarded numerous travel grants, bursaries for summer internships, and small seed funding grants from a variety of sources such as the French *Société Française de Statistique*, the *Elsevier Mathematical Sciences Sponsorship Fund*, European *COST* actions, the *London Mathematical Society*, the UK *EPSRC*...

Awards/Honours

June 2012: Thesis prize, *University of Strasbourg* (€1,500)

Academic and administrative service

As a Full Professor at the University of Angers (2022-present)

- Member (for the Department of Mathematics and the University of Angers) of the Knowledge and Transfer Exchange committee of the Centre Henri Lebesgue.
- Member (for the Department of Mathematics) of the Faculty of Science commission adjudicating upon the admission of foreign students and transfers from other French universities.
- Member (for the Department of Mathematics) of the Faculty of Science hiring committee for fixed-term research and teaching assistants.
- I participate in our Open Days (February 2023).

As a Lecturer and later Associate Professor at ENSAI (2019-2022)

- I was an elected member of the Executive Board of GENES, which is the parent group of ENSAI and ENSAE, as well as a member of ENSAI's Teaching and Research board and in particular of its disciplinary panel.
- I served as the coordinator of ENSAI's MSc double degrees and a member of the Admissions team for these degrees.
- I served as ENSAI's Sustainable Development Officer and chair of the Sustainable Development committee and was part of CREST's Sustainable Development group. I was also ENSAI's representative in the local Sustainable Development (CRICDD) group, made of eleven institutions across all campuses in the Rennes area, and I managed the mailing list of that group.
- I served as a member of the hiring committee for a position in Computer Science and Machine Learning in 2022.

As an Assistant Professor at the University of Nottingham (2016-2019)

- I was the Course Director of the BSc in Statistics, as well as of the BSc in Data Science run in partnership with the School of Computer Science.
- I was the organiser of the weekly research seminar of the Statistics and Probability group in the School of Mathematical Sciences.

As an Assistant Professor at Aix-Marseille Université (2012-2016)

- I served (in June 2016) as a member of the hiring committee for a specialised teaching position in Mathematics.
- I was an elected member of the faculty board within the Economics and Management department.
- I served (in 2014) as a member of the faculty committee which re-designed the mathematical content of the BSc in Economics and Management and I then coordinated the first-year, first-semester courses in Mathematics and Microeconomics.

Academic community service

I am the creator and current editor of the Extreme Value Analysis newsletter. This newsletter, launched in June 2020 and which one can freely subscribe to by emailing directly e.v.analysis.news@gmail.com, is written for the worldwide academic extreme value community, and includes regular information about

conferences, workshops, events as well as offers for PhD and post-doctoral fellowships in the area of probabilistic and statistical extreme value analysis. It currently has more than 350 subscribers.

Organised sessions at conferences/committee membership

- I am among the original members of the organising committee of the *One World Extremes Seminar*, a series of livestreamed research talks on extreme value analysis taking place online approximately once per month from late June 2020. Speakers have included Johan Segers, Gennady Samorodnitsky and Claudia Klüppelberg.
- Member of the scientific program committee of the *16th International Conference of the ERCIM WG on Computational and Methodological Statistics* (December 2023, Berlin, Germany).
- Member of the scientific program committee of the *13th Conference on Extreme Value Analysis* (June 2023, Milan, Italy).
- Member of the local organising committee of the *2023 Probability Days* (June 2023, Angers, France).
- Member of the scientific program committee of the *14th International Conference of the ERCIM WG on Computational and Methodological Statistics* (December 2021, London, UK).
- Member of the local organising committee of the *43rd Research Students' Conference in Probability and Statistics* (July 2020, held online due to the COVID-19 pandemic).
- Member of the scientific program committee of the *11th International Conference of the ERCIM WG on Computational and Methodological Statistics* (December 2018, Pisa, Italy).
- Organiser of the one-day workshop *Recent advances in the statistical analysis of extreme environmental and actuarial risk* (July 2018, University of Nottingham).

I have organised or am organising **invited sessions** of talks at the following international conferences:

- *16th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Berlin, Germany, December 2023.
- *6th International Conference on Econometrics and Statistics*, online session, August 2023.
- *15th International Conference of the ERCIM WG on Computational and Methodological Statistics*, online session, December 2022.
- *5th International Conference on Econometrics and Statistics*, online session, June 2022.
- *14th International Conference of the ERCIM WG on Computational and Methodological Statistics*, online session, December 2021.
- *EVA 2021*, online conference, June 2021.
- *13th International Conference of the ERCIM WG on Computational and Methodological Statistics*, online conference, December 2020.
- *12th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK, December 2019.
- *32nd European Meeting of Statisticians*, Palermo, Italy, July 2019.
- *2nd Workshop on Multivariate Data and Software*, Limassol, Cyprus, April 2019.
- *11th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Pisa, Italy, December 2018. I was also a member of the Scientific Programme Committee for this meeting.

- *10th International Conference of the ERCIM WG on Computational and Methodological Statistics*, London, UK, December 2017.
- *9th International Conference of the ERCIM WG on Computational and Methodological Statistics*, Seville, Spain, December 2016.

I was a session moderator at the following international conferences:

- *4th International Conference on Econometrics and Statistics*, online conference, June 2021.
- *52èmes Journées de Statistique*, online conference, June 2021.

PhD examining duties

- Chair of Eunice Okome Obiang's PhD viva committee, *Contribution to the study of graphical models and high-dimensional statistics applied to the modeling of Triple-Negative Breast Cancer* (University of Angers, PhD supervisors: Loïc Chaumont, Pascal Jézéquel and Frédéric Proïa), October 2022.
- External examiner for Meryem Bousebata's PhD viva, *Statistical inference about extreme risk measures: application to natural disaster insurance* (INRIA Grenoble Rhône-Alpes, PhD supervisors: Stéphane Girard and Geoffroy Enjolras), March 2022.
- External reviewer of Nicholas Beck's PhD thesis, *Quantifying extreme multivariate risks with environmental applications* (McGill University, PhD supervisors: Christian Genest and Mélina Mailhot), December 2020.
- External reviewer of Timo Fuller's PhD thesis, *Contributions to the Multivariate Max-Domain of Attraction* (University of Würzburg, PhD supervisor: Michael Falk), February 2020.

Editorial duties

I serve as an Associate Editor for:

- *Biometrika* (January 2023-present)
- *Computational Statistics and Data Analysis* (June 2022-present)
- *Econometrics and Statistics* (June 2022-present)

Reviewing duties

I have reviewed grant proposals for:

- The French ANR (Agence Nationale de la Recherche),
- The Rennes-based EUR Digisport, which is a research consortium specialised in digital sport science.

I have reviewed papers for *Advances in Water Resources*, *Annals of the Institute of Statistical Mathematics*, *Annals of Statistics*, *AStA Advances in Statistical Analysis*, *Australian & New Zealand Journal of Statistics*, *Bernoulli*, *Biometrika*, *Communications in Statistics: Simulation and Computation*, *Communications in Statistics: Theory and Methods*, *Computational Statistics*, *Computational Statistics and Data Analysis*, *Econometrics and Statistics*, *Economic Modelling*, *Electronic Journal of Statistics*, *Environmetrics*, *European Journal of Operational Research*, *Extremes*, *Insurance: Mathematics and Economics*, *Journal of Business & Economic Statistics*, *Journal of the American Statistical Association*, *Journal of Hydrology*, *Journal of the Korean Statistical Society*, *Journal of Multivariate Analysis*, *Journal of Nonparametric Statistics*, *Journal of the Royal Statistical Society: Series B*, *Journal*

of Statistical Planning and Inference, Journal of Statistical Computation and Simulation, Journal of Statistical Theory and Practice, Mathematical Biosciences, Metrika, Probability in the Engineering and Informational Sciences, Proceedings of the Royal Society of Edinburgh Section A, Quantitative Finance, REVSTAT: Statistical Journal, Sankhya B, Scandinavian Actuarial Journal, Scandinavian Journal of Statistics, Soft Computing, South African Statistical Journal, Statistical Methods & Applications, Statistica Sinica, Statistics, Statistics and Computing, Statistics & Probability Letters, Statistics & Risk Modeling, Technometrics, TEST, The American Statistician and The Quarterly Review of Economics and Finance.

I have also reviewed books for Springer (2016, 2019).

I am currently a reviewer for the *Mathematical Reviews of the AMS* and *zbMATH*.

Membership of professional societies

I am a Fellow of the UK Higher Education Academy and a member of the Société Française de Statistique (SFdS, for French Statistical Society). I am also an elected member and webmaster of the BFA working group of the SFdS.
